WASHINGTON, D. C. 20555

ROCKWELL INTERNATIONAL

DOCKET NO. 50-94

ORDER TERMINATING FACILITY LICENSE

By application dated January 28, 1976, as supplemented March 26, 1976 and January 6, 1982, Rockwell International (the licensee) requested authorization to dismantle the L-77 Reactor (the facility), a research reactor located in Canoga Park, California, to dispose of the component parts in accordance with the plan submitted as part of the application, and to terminate Facility License No. R-40. A "Notice of Proposed Issuance of Orders Authorizing Dismantling of Facility, Disposition of Component Parts, and Termination of Facility License" was published in the Federal Register on April 8, 1976 (41 F.R. 14955). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has found that the facility has been dismantled and decontaminated, and that satisfactory disposition has been made of the component parts and fuel in accordance with the Commission's regulations in 10 CFR Chapter I, and in a manner not inimical to the common defense and security or to the health and safety of the public. The facility was dismantled pursuant to the Commission's Order dated September 29, 1976.

The facility area has been inspected by the Commission's Office of Inspection and Enforcement and radiation surveys confirm that radiation levels meet the values defined in the dismantling plan, and the area is available for unrestricted access.

NRC 1982b Page 1

Therefore, pursuant to the application by the Rockwell International Facility License No. R-40 is hereby terminated as of the date of this Order.

For further details with respect to this action, see (1) application for authorization to dismantle facility and dispose of component parts and for termination of facility license dated January 28, 1976, as supplemented March 26, 1976 and January 6, 1982, (2) the Commission's Order Authorizing Dismantling of Facility and Disposition of Component Parts dated September 29, 1976, and (3) the Commission's related Safety Evaluation. Each of these items is available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C., 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 11th day February 1982
